

# Training programm 2026

# MODULE I: BASIC

**Hydraulics**  
**Electrics**  
**Lifting systems**  
**Drawbar assembly**  
**Axles**  
**Brake systems**  
**Spare parts**  
**Warranty**

Participants receive a detailed system overview as well as essential basic knowledge of the electrical and hydraulic components. Basic knowledge of axles, braking systems and the installation of spare parts completes the training content. In addition, helpful online tools for spare parts ordering, repair support and the warranty processing procedure are presented.

Facts:

2 days

9.00 - 17.00 h

Audience: workshop manager, mechanics

# **MODUL II: LaSi follow-up inspection**

## **Key topics**

### **VDI 2700**

#### **Sheet 3.1**

#### **Sheet 8.1**

#### **Sheet 8.2**

## **Required inspections**

## **Assessment of serviceability**

## **Repair options**

## **Extension of the VDI certification**

Prerequisites: Completion of the 18th year of age and a completed technical education.

Upon request, this training can also be conducted in multiple languages. In this case, additional costs may apply.

Participants receive expert knowledge on VDI 2700 in accordance with Sheet 3.1 as well as Sheets 8, 8.1 and 8.2, illustrated through practical case studies. The training provides the necessary knowledge to carry out inspections and to extend load securing certificates for vehicles of Kässbohrer Transport Technik GmbH. After successful completion, a certificate with a validity of three years as well as a personal inspector number is issued. This authorization applies to certificate extensions within the company's own fleet. For authorized service partners, there are no customer-related restrictions.

### **Facts:**

1 day

8.30 - 16.30 h

Audience: Workshop managers, mechanics, master technicians and fleet managers (with technical training)

# MODULE IV: SEMITRAILER & CV

## **Product-related special training on the enclosed car transporter and the semitrailers**

Participants receive a detailed system overview as well as essential basic knowledge of the electrical and hydraulic components of enclosed car transporters and semi-trailers. Basic knowledge of axles, braking systems and the installation of spare parts completes the program.

Facts:

2 days

9.00 - 17.00 h

Audience: workshop manager, mechanics

# CONDITIONS FOR PARTICIPATION

## Written registration

Registration must be submitted in writing by email to [training@kaessbohrer.at](mailto:training@kaessbohrer.at)

As the number of participants for our workshops is limited, registrations will be processed in the order in which they are received. By registering, participants accept the terms and conditions of participation. There is no legal entitlement to participate.

## Number of participants

To ensure that each seminar participant gains the maximum benefit from our events, we aim to limit the number of participants to a maximum of 12 people.

## Participation fee

The participation fee for a two-day seminar will be announced on request. The fee includes the seminar itself, all seminar materials, and refreshments provided during the workshop. Registration is binding and creates an obligation to pay the participation fee. The invoice will be issued after the seminar. The obligation to pay the participation fee applies even in the event of non-attendance. All seminar fees are exclusive of statutory VAT and are payable in full upon receipt of the invoice, without any deductions.

## Conditions of cancellation

Cancellations received up to ten working days prior to the seminar are free of charge. For later cancellations, a cancellation fee of 50% of the seminar fee will be charged. In the event of non-attendance, a cancellation fee of 100% of the seminar fee will apply. We appreciate your understanding. Kässbohrer Transport Technik GmbH reserves the right to cancel scheduled seminars due to an insufficient number of participants, trainer illness, force majeure or other unforeseen events. Participants will be informed immediately. Any expenses incurred by participants will not be reimbursed. If, in the interest of the participants, certain topics are addressed in greater depth and therefore not all planned topics can be covered, there is no entitlement to a refund.

Separate cancellation conditions apply to load securing follow-up inspection trainings. Please refer to the registration form for details.

## Schedules for two-day seminars

Workshops held in Eugendorf start at 9:00 a.m. on the first day and on the second day. The workshop ends at 5:00 p.m. on the second day. Start and end times at other training locations are determined individually.

## Data protection

Your data will be stored on the data systems of Kässbohrer Transport Technik GmbH for processing purposes. Your data will not be passed on to third parties.
